TRANSFERLIFE

PATIENT TRANSFER DEVICE.

Transferlife®

Patient Transfer Device

Medevice-Transferlife, is a patient transfer device that assists in effortless transfer of patient from stretcher to bed, bed to bed and vice versa, without lifting the patient. It is a fabric based solution that reduces transfer time and effort significantly.

The ergonomic design enables a comfortable transfer of patients while keeping healthcare workers safe from the risk of injuries. The device includes a top surface and a bottom surface, wherein the bottom surface has a substantially low co-efficient of friction. The sheet has an in-built system that provides rigidity & strength to enable smooth patient transfer.

CONVENIENT AND HASSLE FREE PATIENT TRANSFERS

Easy slide design and strong side handles enables the easy and convenient patient transfers.

The ease and comfort makes the transfers hassle free and effective compared to the traditional sheet transfers.

REDUCES BACK INJURY RISK FOR HEALTHCARE WORKERS

Designed keeping in mind the involvement of healthcare workers in mobilizing the patients in emergency conditions.

It helps them reduce the impact on their back-bones while transferring a patient.

ANTI MICROBIAL

The medical grade textile material is a patented mix of fibers, which makes it anti-fungal and anti-bacterial in nature. They keep the mattress contamination-free incase of any bodily fluids etc.

LIGHT WEIGHT & DISPOSABLE

It's design & texture makes it really light and convenient to tender healthcare services in emergency situations.

GAMMA STERILIZED & SPILL PROOF

Protection from infections as it is Gamma Sterilized, controls cross contamination and easily disposable.

UNIQUE FEATURES

- Simple, Robust, High tensile quality product which enables patients transfer among beds or stretchers of different heights.
- Avoids the process of lifting the patient while transferring from one bed to the other which can cause injury to patients especially spinal injury to orthopedic patients.
- No maintenance, storage or power source required for patient transfer.
- Protects mattress by absorbing body fluids.
- No insertion is required underneath the patient for transfer.
- Waterproof, Sterile and Durable.
- Friction reducing device decreases physical strain to the users.
- Sterile & disposable, controls cross- contamination, laundry & sterilization costs.
- Disposable and gamma sterilized – protects from infections.
- Ability to transfer the patients on beds and stretchers of different heights up to 6" and gap up to 3".
- Non Toxic.

MATTRESS SHIELD

MATTRESS PROTECTORS.

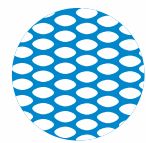

Mattress Shield by VFPL-Medevic is a benchmark quality mattress protector designed to keep mattresses safe at the same time providing real comfort to the users.

With medical grade fabric, Mattress Shield has been created using a special membrane lamination that is water-proof and breathable. To achieve great resistance to washing, Mattress Shield is manufactured using German Technology which gives it an elasticity that allows perfect adaptation of body movement.

SUPER BREATHABLE SURFACE

Made with natural and spacer fibers, the mattress shield is breathable and adapts to body movements.

With this perfect combination, Mattress Shield provides ultimate comfort and uninterrupted sleep.

ANTI-MICROBIAL FINISH

The sheets are skin-friendly and help people with certain allergies by trapping dust mites

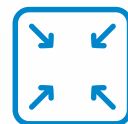

It keeps mattress safe and hygienic by preventing virus, bacteria, perspiration/sweat, stains, spills, body fluids etc from reaching the mattress.

DOUBLES UP AS BEDSHEET

Almost undetectable, light-weight, cozy and super thin material makes it to double-up as bedsheet.

PERFECT ELASTIC FIT

Light-weight and hassle-free to fit on the mattress. Elastic sewn all around gives it a perfect fit around the mattress.

EASY TO WASH

Made with durable material that can withstand even the hard machine wash and can be used upto hundred wash cycles.

MATTRESS PROTECTOR

- Multipurpose and cost effective
- Infection free
- Reusable/washable
- Easy to handle
- Spill proof
- Breathable
- Fit to size customised

VISTA FURNISHINGS PVT. LTD.

KANGAROO MOTHER CARE PRE-TERM WRAP.

Mamma Pod is a wrap designed to help parents provide continuous and quality skin-to-skin care, warmth and support to their pre term and low weight babies. It can be used till the baby is 2 months old or still the time babies attain 2 kgs weight.

The ergonomic wrap design keeps baby secure and safe in place with little strain on the shoulders and back of the parent. Kangaroo mother care(KMC) is associated with a 51% reduction in infant mortality when compared to incubator care, if started in the first week of birth.

* Should be changed & washed daily.

PRIVACY AND COMFORT

The Mumma Pod is a perfect KMC for Skin-to-Skin care of pre-term new-borns and scores over traditional usage of sheets on privacy and comfort.

It does not need an assistant and facilitates frequent removal for breastfeeding, keeping mother's comfort and privacy intact.

SAFER BABY POSITIONING

The ergonomic wrap design keeps the baby securely in place with little strain on the shoulders and back of the parent.

It safely keeps baby in secure posture. Mothers feel relaxed and do not feel the need to hold the baby.

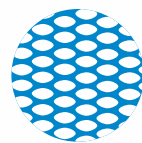

BREAST FEEDING FRIENDLY

Allows movement even when worn, makes it easy for mother to breast-feed without removing the wrap. Less fatigue for back and shoulders due to wide straps on the shoulders.

GENDER NEUTRAL

The product look is very much acceptable to wear for fathers as well. The design is such that it fits well on different body sizes and thus makes this product a unisex usable wrap.

BREATHABLE FABRIC

The breathable fabric of The Mumma Pod makes it soft and cozy place for the baby to be in and provides the ultimate comfort for the wearer, even during long hours of usage.

MAMMA POD FEATURES

- Maintain warmth, safety & supports early breast feeding for low birth weight or preterm babies
- Skin to skin contact between mother and baby
- Hands free mode to perform daily activities
- Breathable
- Culturally and socially acceptable to women
- Washable
- Sterilized
- The pouch is flexible to accommodate the growth & weight of baby as it grows.
- Ambulatory in nature - provides freedom to the parent.

TECHNICAL SPECIFICATIONS

SIZES : Small, Medium and Large | **COLORS** : Melange, Baby Pink and Baby Blue

Patented Design developed in association with IITD & AIIMS.

CURTAIN CODE

HOSPITAL CURTAINS AND TRACKS.

CURTAIN[®]
CODE cc

Protecting privacy and ensuring safety against microbials, Curtain Code brings to you a full range of hospital curtains and accessories.

The sterilized fabric makes these curtains infection free and easy to dispose and at the same time durable enough to stand a number of wash cycles. The accessories are simple to operate and easy to install.

ANTI BACTERIAL FABRICS

These fabrics with anti-bacterial finish are highly resistant to the proliferation of fungi and bacteria and help to prevent the cross contamination.

Developed for healthcare use these fabrics are 100% inherently flame retardant.

ENSURE PROTECTED PRIVACY

For a place like hospitals, where the need of protected privacy is integral, these curtains ensure an impeccable privacy for the patients.

EASY TO INSTALL

These curtains are available in standard sizes and can also be customized as per the size requirement, which in turn makes it easy to install them.

EASY TO DISPOSE

The sterilized fabric makes these curtains easy to dispose after usage in high infection area such as emergency wards, virus breakout wards, etc.

COST EFFECTIVE

Durable and washable, can be used multiple times. Makes it a cost-effective proposition for hospital curtains.

SPECIFICATION FOR HOSPITAL CURTAIN

- Curtain fabric composition is 100% polyester.
- Flame retardant- Inherent flame retardant woven fabric which has permanent flame retardant function even after washing
- Anti bacterial- Fabric is resistant to golden staphylococcus, bacillus coli and white monilia.
- Water repellent, antistatic, mould proof, anti dust, strain relief.
- Curtain size customized As per size required by the customer, as is the Mesh
- Color as per the customer preference- specific colors can be dyed with a minimum length 800m per color.
